EDUCATION

Bachelor of Science (Hons.) in Physics

Universiti Malaya

CGPA: 3.79

Achievements: Dean's List

October 2022 – Present

Kuala Lumpur, Malaysia

Scholastic Assessment Test (SAT)

Score: 1560

December 2021

International Advanced Levels (IAL)

Maple Leaf International School

GPA: 5.00

Grades: 4A*s

Achievements: School Valedictorian, The Daily Sun Award

October 2020

Dhaka, Bangladesh

International General Certificate of Secondary Education (IGCSE)

Maple Leaf International School

GPA: 5.00

Grades: 8A*s, 2A

Achievements: World Highest in Mathematics, Edexcel Award, The Daily Star Award

June 2018

Dhaka, Bangladesh

SKILLS

- **Programming Languages:** Python, JavaScript
- **Technologies & Frameworks:** Arduino UNO, ESP8266 NodeMCU V3
- **Software Tools:** Visual Studio Code, Spyder, Google Colab, LaTeX
- **Languages:** English (IELTS 8.0), Bengali (1st Language), German (A1 Certification), Spoken Hindi and Urdu, Basic Bahasa Melayu
- **Other Skills:** Adobe Photoshop, Adobe Lightroom, Adobe InDesign, Adobe Illustrator, MS Office Suite, Canva, DaVinci Resolve, Notion

PROJECTS

Investigating the Effect of Telescope Array Configuration on Imaging and Modelling of Active Galactic Nuclei Jets Using DIFMAP | DIFMAP, Notion

October 2025 – Present

Final Year Project (Undergraduate).

Supervised by: Dr. Juan Carlos Algaba Marcos.

This project investigates how variations in VLBA interferometric baseline coverage influence the reliability and accuracy of AGN jet imaging. Working under the supervision of Dr. Juan Carlos Algaba Marcos, I analyse visibility data under different array configurations, evaluate imaging robustness, and model jet structures using DIFMAP. The project has strengthened my skills in Python-based data preprocessing, elementary C through terminal use, and advanced DIFMAP operations including CLEANing, self-calibration, and model-fitting. It has also provided substantial hands-on experience with VLBI imaging pipelines and radio astronomy analysis techniques.

NETR – Solar Voices | Solar technology, Canva, MS Office Suite, DaVinci Resolve

March 2025 – June 2025

As part of a SULAM community development initiative, I helped design and execute an outreach programme introducing the benefits of solar energy to the Taman Setapak community. The project involved producing educational infographics, delivering public talks, and conducting practical demonstrations to promote renewable energy awareness. Working with a multidisciplinary team, I coordinated scheduling and content creation while refining my skills in graphic design, project planning, video editing, and community engagement. The project offered valuable experience in communicating technical concepts to non-technical audiences.

Net Nimbus | Arduino UNO, ESP8266 NodeMCU V3, Telegram Bots, Basic Electronics

October 2023 – February 2024

Net Nimbus is a two-person IoT project that enables remote control of household appliances through a custom Telegram bot, allowing access from anywhere with an internet connection. The system integrates an Arduino UNO with an ESP8266 NodeMCU to execute commands sent through the bot, while the underlying electronics manage safe switching of household devices. Through this project, I gained practical experience in microcontroller programming, basic

electronics, and internet-based IoT communication, along with hands-on development of a functional, reliable home-automation prototype.

EXTRACURRICULAR ACTIVITIES

General Member | Persatuan Fizik UM (PerFUM)
Universiti Malaya

October 2022 – Present

- Fostered a teamwork friendly environment working as a volunteer in events.
- Lead of Logistics for PERFUM Industrial Visit 2024 to MIMOS, arranged catering and transport for 30 participants while ensuring smooth integrated workflow with other PERFUM departments.

Vice-President | MLIS Science Club
Maple Leaf International School

2018 – 2020

- Organised the school's inaugural Science Olympiad and coordinated the annual Science Fair.
- Led a team of student volunteers, developing strong task-delegation skills while supporting individual members' needs.
- Acted as liaison with the school board, ensuring smooth communication and alignment between institutional requirements and club objectives.

Founding Officer | MLIS Robotics Club
Maple Leaf International School

2019 – 2020

- Established the school's first Robotics Club, fostering a culture of creativity, problem-solving, and hands-on STEM learning.
- Organised robotics and Arduino workshops, as well as the school-wide Robotics Competition, managing participation of over 1,200 students.
- Implemented a round-table leadership model to reduce internal friction, promote collaboration, and help members achieve their best work.

Champion | Academia English Medium Mathematics Olympiad

2019

- Senior category champion for the nationwide competition

Bronze Medalist | International Youth Maths Challenge

2019

- Achieved Bronze in the acclaimed international mathematics competition.

Participant

National Mathematics Olympiad, National Physics Olympiad, National Chemistry Olympiad, 3rd Annual Astrophysics Carnival

2018-2020

- Secured national round positions

Others

- UM POW 3MT Presenter
- St. Joseph Math Olympiad Speedcubing top 10
- Intra-School Chess Champion
